Claims:

Claim 1 (currently amended). A computer-based <u>implemented</u> system for <u>transforming a</u> <u>proportion of the equity in property owned by a person to providing equity based benefits to a <u>the person dependent upon equity in property owned by the person</u>, said system comprising:</u>

- a memory for storing a program; and
- a processor for executing the program, said program comprising:
- (a) code for receiving personal information about the person;
- (b) code for communicating at least some the personal information to a financier to securing obtain a loan secured by a-said proportion of the equity, the loan having a principal value for a defined term and being 100% capital guaranteed by the service provider;
- (<u>c</u>b) code for repaying the loan by periodically <u>directing paying an interest charge payment determined on a simple interest basis to the financier;</u>
 - (de) code for investing a residual of the loan;
- (ed) code for, if where said personal information specifies an equity-based retirement savings option -is elected, accumulating earnings from the invested residual of the loan according to the method of claim 22, said accumulating earnings representing said equity based benefits; and
- (fe) code for, if where said personal information specifies a life-expectancy retirement annuity option is elected, directing making a periodic payment from the residual of the loan to the person according to the method of claim 7, said periodic payments representing said equity based benefits; wherein the principal value of the loan becomes due for repayment by the person at the end of the defined term.

Claim 2 (currently amended). A system according to claim 1, wherein:

the memory is configured as a plurality of memory modules;

the program is configured as a plurality of <u>interacting</u> inter-related program modules stored in corresponding said memory modules; and

the processor is configured as a plurality of processor modules for executing the program modules, wherein at least some of the plurality of processor modules <u>are</u> adapted to communicate over a network.

Claim 3 (currently amended). A system according to claim 1, wherein if a rate of return of an investment in which said residual of the loan is invested according to the code (<u>de</u>) falls below a <u>pre-defined</u> threshold, the program further comprises:

- (f) code for capitalizeing an additional loan amount needed to compensate for a difference between the rate of return and the threshold; and
- (g) code for adding said additional loan to the principal of the loan to be repaid at the end of the defined term.

Claim 4 (currently amended). A computer program product including a computer readable storage medium having recorded thereon a computer program for directing a processor to execute a method instructions for transforming a proportion of the equity in property owned by a person to providing equity based benefits to a the person dependent upon equity in property owned by the person, said program product comprising:

- (a) code for receiving personal information about the person;
- (b) code for communicating at least some the personal information to a financier to obtain securing a loan secured by a-said proportion of the equity, the loan having a principal value for a defined term and being 100% capital guaranteed by the service provider;

- (<u>c</u>b) code for repaying the loan by periodically paying <u>directing</u> an interest charge <u>payment</u> determined on a simple interest basis to the financier;
 - (de) code for investing a residual of the loan;
- (ed) code for, if where said personal information specifies an equity-based retirement savings option-is elected, accumulating earnings from the invested residual of the loan according to the method of claim 22, said accumulating earnings representing said equity based benefits; and
- (fe) code for, if where said personal information specifies a life-expectancy retirement annuity option is elected, making directing a periodic payment from the residual of the loan to the person according to the method of claim 7, said periodic payments representing said equity based benefits; wherein the principal value of the loan becomes due for repayment by the person at the end of the defined term.

Claim 5 (currently amended). A computer-based <u>implemented</u> system for <u>transforming a</u> <u>proportion of the equity in property owned by a person to providing equity based benefits to a <u>the person-dependent upon equity in property owned by the person</u>, said system comprising:</u>

- (a) means for receiving personal information about the person;
- (b) means for communicating at least some the personal information to a financier to obtain securing a loan secured by a-said proportion of the equity, the loan having a principal value for a defined term and being 100% capital guaranteed by the service provider;
- (bc) means for repaying the loan by periodically paying directing an interest charge payment determined on a simple interest basis to the financier;
 - (de) means for investing a residual of the loan;

- (ed) means for, if where said personal information specifies an equity-based retirement savings option is elected, accumulating earnings from the invested residual of the loan according to the method of claim 22, said accumulating earnings representing said equity based benefits; and
- (e) means for, if where said personal information specifies a life-expectancy retirement annuity option is elected, directing making a periodic payment from the residual of the loan to the person according to the method of claim 7, said periodic payments representing said equity based benefits; wherein the principal value of the loan becomes due for repayment by the person at the end of the defined term.

Claim 6 (currently amended). A method for <u>transforming a proportion of the equity in property owned by a person to providing equity based benefits to a the person-dependent upon equity in property owned by the person, said method being implemented on a computer basesd system comprising at least one program running on a corresponding at least one computer platform, said method comprising the steps of:</u>

- (a) receiving personal information about the person by a service provider computer;
- (b) communicating, from the service provider computer to a financier computer at least some the personal information to a financier to obtain securing a loan secured by a-said proportion of the equity, the loan having a principal value for a defined term and being 100% capital guaranteed by the service provider;
- (c) repaying the loan by periodically paying directing, from the service provider computer to the financier computer, an interest charge payment determined on a simple interest basis-;
 - (d) investing, by the service provider computer, a residual of the loan;

- (e) if where said personal information specifies an equity-based retirement savings option-is-elected, accumulating, by the service provider computer, earnings from the invested residual of the loan according to the method of claim 22, said accumulating earnings representing said equity based benefits; and
- (f) if where said personal information specifies a life-expectancy retirement annuity option is elected, making directing, by the service provider computer, a periodic payment from the residual of the loan to an account of the person according to the method of claim 7, said periodic payments representing said equity based benefits; wherein the principal value of the loan becomes due for repayment by the person at the end of the defined term.

Claim 7 (currently amended). A <u>computer implemented</u> method of <u>transforming a</u>

<u>proportion of the equity in property owned by a person to generating, for a person, periodic payments to secured by equity in property of the person, the method comprising the steps of:</u>

- (a) executing, by the service provider computer, a single agreement with the person, said agreement being in the form of a comprehensive financial instrument; and only if said single agreement has been executed, performing the following steps of:
- (ba) communicating, by the service provider computer to a financier computer, information about the person to obtain obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by said proportion of the equity and being 100% capital guaranteed by the service provider;
- (cb) repaying the loan by periodically paying, to the first provider over the term, directing, by the service provider computer to the financier computer, an interest payment determined on a simple interest basis;

- (de) <u>directing</u>, by the service provider computer to an account of paying, to the person, the periodic payments, said periodic payments being subject to a minimum income guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) charging the person, in regard to each said periodic payment, a charge determined on a simple interest basis;
- (ee) investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (cb) and (de) and the amount received in the step (d); and
- (ff) repaying, by the person to the first provider financier at the end of the defined term, the principal of the loan.

Claim 8 (currently amended). A method according to claim 7, wherein the residual of the loan invested in the investment vehicle at <u>any a</u> time during the <u>defined</u> term of the loan is equal to the principal of the loan less (i) the accumulated payments made in the steps (<u>bb</u>) and (<u>ced</u>) from the time the loan was obtained until said any time being considered, plus (ii) the accumulated charges received in the step (<u>dd</u>) from the time the loan was obtained until said any time being considered.

Claim 9 (cancelled).

Claim 10 (currently amended). A method according to claim 97, wherein the amounts paid in the steps (bb) and (cc) are drawn from the residual of the loan and the amount received in the step (dd) is paid into the residual of the loan.

Claim 11 (currently amended). A method according to claim <u>79</u>, wherein:

the loan <u>obtained has a principal value</u> is less than or equal to 45% of the equity in the property <u>of owned by</u> the person;

the <u>interest payment directed to the financier computer first fixed proportion</u> is in a range of 4.0% and 5.5% of the <u>principal value of the loan</u>;

the <u>charge to the person second fixed proportion</u> is in a range of <u>0.05% and 0.25%7.5%</u> and <u>12.0%</u> of each periodic payment; and

the compound rate of return is in a range of 7.5% and 12.0% of the residual of the loan that is invested in the investment vehicle.

Claim 12 (cancelled).

Claim 13 (cancelled).

Claim 14 (currently amended). A method according to claim <u>7</u>12 wherein the profit derived by the second service provider comprises the charge levied in the step (da).

Claim 15 (currently amended). A method according to claim 97 wherein the profit derived by the second-service provider is drawn from the residual of the loan.

Claim 16 (cancelled).

Claim 17 (original). A method according to claim 7, wherein the person is a retiree and the property of the retiree is the home of the retiree.

Claim 18 (cancelled).

Claim 19 (cancelled).

Claim 20 (currently amended). A system for <u>transforming a proportion of the equity in property owned by a retiree to generating, for a retiree, periodic payments to the retireesecured by equity in the retiree's home, the system comprising:</u>

- (a) means for a service provider computer for communicating, to a financier computer, information about the person to a financier to obtain obtaining, by a service provider from a financier, a loan having a principal value for a defined term, wherein the loan is secured by the said proportion of the equity in the retiree's home and is 100% capital guaranteed by the service provider;
- (b) means for <u>directing</u>, by the service provider computer to the financier computer, repaying the loan by periodically paying, by the service provider to the financier over the term, an interest repayment determined on a simple interest basis;
- (c) means for <u>directing</u>, by the <u>service provider computer to an account of paying</u>, by the <u>service provider to the the retiree</u>, the periodic payments, <u>said periodic payments being subject to a minimum income guarantee underwritten by the service provider</u>, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) means for charging the retiree by the service provider, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) means for investing, by the service provider computer, by which the service provider invests a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the simple interest payments to the financier in the step (b) and the periodic payments to the retiree in the step (c) and the simple interest charges paid by the retiree in the step (d); wherein and
- (f) means for repaying, by the retiree repays, to the financier at the end of the defined term, the principal of the loan.

Claim 21 (currently amended). A computer program product having a computer readable storage medium having at least one computer program module recorded therein for directing at least one processor to implement a method of execute instructions for transforming a proportion of the equity in the home owned by a retiree to generating, for a retiree, periodic payments to the retireesecured by equity in the retirees home, the at least one program module product comprising:

- (a) code for <u>communicating</u>, by a <u>service provider computer</u> to a <u>financier computer</u>, <u>information about the person to obtain obtaining</u>, by a <u>service provider from a financier</u>, a loan having a principal value for a defined term, wherein the loan is secured by <u>said proportion of</u> the equity <u>and is 100% capital guaranteed by the service provider in the retiree's home</u>;
- (b) code for periodically <u>directing</u>, by the <u>service provider computer to the financier</u> computer, paying, by the <u>service provider to the financier over the term</u>, an interest repayment determined on a simple interest basis;
- (c) code for <u>directing</u>, by the service provider computer to an account of paying, by the service provider to the retiree, the periodic payments, said periodic payments being subject to a minimum income guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) code for charging, the retiree by the service provider, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) code for investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the simple interest payments to the financier in the

- step (b) and the periodic payments to the retiree in the step (c) and the simple interest charges paid by the retiree in the step (d); wherein and
- (f) code for repaying, by the retiree <u>repays</u> to the financier at the end of the <u>defined</u> term, the principal of the loan.

Claim 22 (currently amended). A <u>computer-implemented</u> method of <u>transforming a</u>

<u>proportion of the equity in property owned by a person to generating, for the benefit of a person and a service provider, periodic payments to dependent upon equity in property of the person, the method comprising the steps of:</u>

- (a) communicating, by a service provider computer to a financier computer, information about the person to obtain a obtaining from a financier a loan secured by the equity, the loan having a principal value and being for a term defined by a number of periods and being 100% capital guaranteed by the service provider;
- (b) investing, by the service provider computer, the loan in a first investment vehicle that yields a first return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:
- value, a first amount determined on a simple interest basis, and withdrawing, by the service provider computer, said first amount from the residual of the loan invested in the first investment vehicle, and determining, by the service provider computer, in regard to the principal value, a second amount determined on a simple interest basis, and withdrawing, by the service provider computer, said second amount from the residual of the loan invested in the first investment vehicle;

- (ii) paying directing, by the service provider computer to the financier computer, the first amount to the financier;
- (iii) deducting, by the service provider computer, a charge from said second amount, said charge comprising the a benefit for the service provider;
- (iv) investing, by the service provider computer, for the benefit of the person the residual of the second amount in an investment vehicle yielding a second return for the current period, said second return being lower than the first return;
 - (c) repeating the steps (i) (iv) for said number of periods; wherein and
- (d) repaying, by the person repays to the financier at the end of the defined term, the principal of the loan.

Claim 23 (original). A method according to claim 22, wherein the financier is the service provider.

Claim 24 (original). A method according to claim 22, wherein in the step (iv) an additional investment is made in the investment vehicle yielding the second return for the current period.

Claim 25 (original). A method according to claim 24, wherein the additional investment is a savings contribution by the person.

Claim 26 (currently amended). A method according to claim 25, wherein following the step (<u>cd</u>) the method comprises further steps of:

(da) obtaining from the financier communicating, by a service provider computer to a financier computer, information about the person to obtain another loan secured by equity in the property of the persons home, the other loan having a principal value and being for a defined term-defined by a number of periods;

U.S. Serial No. 10/592,020 Amendment Dated February 24, 2009 Reply to Notice of February 6, 2009

- (e) periodically directing, by the service provider computer to the financier computer, an interest repayment determined on a simple interest basis;
- directing, by the service provider computer to an account of the person, the periodic payments, said periodic payments being subject to a minimum income guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (bg) investing, by the service provider computer, a residual of the other loan, and the funds accumulated in the investment vehicle yielding the second return, in another an investment vehicle that yields a return at a compound rate, said residual of the loan being dependent upon the amounts paid in the steps (f) and (g) return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:
- (i) determining, in regard to the principal value, a third amount determined on a simple interest basis, and withdrawing said third amount from the residual of the loan invested in the first investment vehicle, and determining in regard to the principal value a fourth amount determined on a simple interest basis, and withdrawing said fourth amount from the residual of the loan invested in the first investment vehicle;
 - (ii) paying the third amount to the financier;
- (iii) deducting a charge from saidfourth amount, said charge comprising the benefit for the service provider;
 - (iv) paying the residual of the second fixed proportion to the person;
- repeating the steps (i) (iv) for said number of periods; wherein the retiree repays to the financier at the end of the defined term, the principal of the loan.

Claim 27 (currently amended). A computer based implemented method of transforming a proportion of the equity in property owned by a person to generating, for a person, periodic payments for the person secured by equity in property of the person, the method comprising the steps of:

- (a) communicating, by a service provider computer to a financier computer, information about the person to a financier to obtain obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by said proportion of the equity and is 100% capital guaranteed by the service provider;
- (b) periodically <u>directing</u>, by the service provider computer to the financier computer paying, to the first provider over the term, an interest payment determined on a simple interest basis;
- (c) <u>directing</u>, by the service provider computer to an account of paying, to the person, the periodic payments, said periodic payments being subject to a minimum income guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) charging the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); and
- (ef) repaying, by the person to the first provider financier at the end of the defined term, the principal of the loan; wherein:

(fg) if the compound rate in the step (de) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalized, by the service provider computer, and added to the principal of the loan to be repaid to the first provider in the step (ef).

Claim 28 (currently amended). A computer based implemented method according to claim 27, comprising the further step of:

(h) if where the compound rate in the step (e) rises above a second threshold, then accumulated surplus funds accruing in the investment vehicle are deducted, by the service provider computer, from the principal of the loan to be repaid to the first provider financier in the step (f).

Claim 29 (currently amended. A <u>computer-implemented</u> system for <u>transforming a proportion of the equity in property owned by a person to administering an equity based arrangement of generating, for a person, periodic payments secured by equity in property of <u>to</u> the person, the system comprising:</u>

- (a) means for <u>communicating</u>, by a <u>service provider computer to a financier</u> computer, information about the person to a financier to obtain obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by said proportion of the equity and is 100% capital guaranteed by the service provider, wherein the loan is secured by the equity:
- (b) means for periodically paying, to the first provider over the term, directing, by the service provider computer to the financier computer, an interest payment determined on a simple interest basis;

- (c) means for <u>directing</u>, by the <u>service provider computer to an account of paying</u>, to the person, the periodic payments, <u>said periodic payments being subject to a minimum income guarantee underwritten by the service provider</u>, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) means for charging the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) means for investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); wherein the person repays the principal of the loan to the financier at the end of the defined term; and
- (f) means for repaying, to the first provider at the end of the term, the principal of the loan; wherein:
- (efg) if where the compound rate in the step (ed) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalized by the service provider computer and added to the principal of the loan to be repaid to the first provider financier in the step (dfe).

Claim 30 (currently amended). A <u>computer-implemented</u> system for <u>transforming a</u>

<u>proportion of the equity in property owned by a person to administering an equity based</u>

<u>arrangement of generating, for a person, periodic payments to secured by equity in property of the person, the system comprising:</u>

a plurality of memory modules for storing a corresponding plurality of inter-related application program modules; and

a plurality of processor modules for executing the program modules, said program modules comprising:

- (a) code-means for communicating-, by a service provider computer to a financier computer, information about the person to obtain a obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by said proportion of the equity and is 100% capital guaranteed by the service provider;
- (b) <u>means code</u>-for periodically <u>directing</u>, by the service provider computer to the <u>financier computer paying</u>, to the first provider over the term, an interest payment determined on a simple interest basis;
- (c) means code for directing, by the service provider computer to an account of paying, to the person, the periodic payments, said periodic payments being subject to a minimum income guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) code for charging the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) means code for investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c)-and the amount received in the step (d); and
- (f) code for repaying, to the first provider wherein the person repays, at the end of the defined term, the principal of the loan to the financier; wherein:
- (gef) if where the compound rate in the step (ed) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated

interest, is capitalized by the service provider computer and added to the principal of the loan to be repaid to the first provider-financier in the step (dfe).

Claim 31 (currently amended). A computer program product including at least one computer storage readable medium having recorded thereon a plurality of inter-related computer application program modules for directing a plurality of processor modules to execute a method instructions for transforming a proportion of the equity in property owned by a person to generating, for a person, periodic payments to the person secured by equity in property of the person, said program modules product comprising:

- (a) code for communicating, by a service provider computer to a financier computer, information about the person to a financier to obtain obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by said proportion of the equity and is 100% capital guaranteed by the service provider;
- (b) code for periodically <u>directing</u>, by the service provider computer to the financier <u>computer</u>, paying, to the first provider over the term, an interest payment determined on a simple interest basis;
- (c) code for <u>directing</u>, by the service provider computer to an account of paying, to the person, the periodic payments, <u>said periodic payments being subject to a minimum income guarantee underwritten by the service provider</u>, and being reversionary in the event of the <u>persons death and thus 100% payable for the loan term to a named beneficiary</u>;
- (d) code for charging the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) code for investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said

residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); wherein the person repaysand

- (f) code for repaying, to the first provider financier at the end of the defined term, the principal of the loan; wherein:
- (egf) if where the compound rate in the step (ed) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalized by the service provider computer and added to the principal of the loan to be repaid to the first provider financier in the step (fde).

Claim 32 (currently amended). A plurality of inter-related <u>computer program products</u> including respective computer readable storage media having recorded thereon computer programs for directing respective processors to execute instructions for transforming a proportion of the equity in property owned by a person to computer application program modules for directing a plurality of processor modules to execute a method for generating, for a person, periodic payments secured by equity in property of to the person, said program modules products comprising:

- (a) code for <u>communicating</u>, by a service provider computer to a financier computer, information about the person to a financier to obtain obtaining, from a first provider, a loan having a principal value for a defined term, wherein the loan is secured by <u>said proportion of</u> the equity <u>and is 100% capital guaranteed by the service provider</u>;
- (b) code for periodically <u>directing</u>, by the service provider computer to the financier computer, paying, to the first provider over the term, an interest payment determined on a simple interest basis;

- (c) code for <u>directing</u>, by the service provider computer to an account of paying, to the person, the periodic payments, <u>said periodic payments being subject to a minimum income</u> guarantee underwritten by the service provider, and being reversionary in the event of the persons death and thus 100% payable for the loan term to a named beneficiary;
- (d) code for charging the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis;
- (de) code for investing, by the service provider computer, a residual of the loan, in an investment vehicle yielding a return at a compound rate on said residual of the loan, said residual of the loan being dependent upon the amounts paid in the steps (b) and (c) and the amount received in the step (d); wherein the person and
- (f) code for repaying, repays to the first provider financier at the end of the defined term, the principal of the loan; wherein:
- (gef) if where the compound rate in the step (ed) falls below a first threshold, an additional loan amount needed to compensate for the reduced compound rate, and associated interest, is capitalized by the service provider computer and added to the principal of the loan to be repaid to the first provider in the step (fde).

Claim 33 (cancelled).

Claim 34 (cancelled)

Claim 35 (currently amended). A <u>computer-implemented</u> method of <u>transforming a</u>

<u>proportion of the equity in property owned by a person to generating, for the benefit of a person and a service provider, periodic payments dependent upon equity in property of to the person, said method being implemented on a computer based system comprising at least one program running on a corresponding at least one computer platform, the method comprising the steps of:</u>

- (a) communicating, by a service provider computer to a financier computer, information about the person to a financier to obtain obtaining from a financier a loan secured by the equity, the loan having a principal value and being for a term defined by a number of periods and being 100% capital guaranteed by the service provider;
- (b) investing, by the service provider computer, the loan in a first investment vehicle that yields a first return for each said period on the amount invested; the method further comprising, for a current said period, the steps of:
- determined on a simple interest basis with reference to the principal value, and further withdrawing a fixed proportion of the principal value, from the residual of the loan invested in the first investment vehicle;
- (ii) <u>periodically directing, by the service provider computer to the financier</u>

 <u>computer paying</u> the interest charge to thereby repay the loan to the financier;
- (iii) deducting, by the service provider computer, a charge from said fixed proportion, said charge comprising the <u>a</u> benefit for the service provider;
- (iv) investing, by the service provider computer, for the benefit of the person the <u>a</u> residual of the fixed proportion in an investment vehicle yielding a second return for the current period, said second return being lower than the first return;
- (c) repeating, by the service provider computer, the steps (i) (iv) for said number of periods; wherein and
- (d) repaying, by the person repays, to the financier at the end of the term, the principal of the loan.

Claim 35 (new). A method according to claim 7, comprising a further step of:

charging, by the service provider computer from the account of the person, in regard to
each said periodic payment, a charge determined on a simple interest basis.

Claim 36 (new). A system according to claim 20, further comprising:

means for charging, by the service provider computer from the account of the retiree, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

Claim 37 (new). A computer program product according to claim 21, further comprising: code for charging, by the service provider computer from the account of the retiree, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

Claim 38 (new). A method according to claim 26, comprising a further step of: charging, by the service provider computer from the account of the person, in regard to

Claim 39 (new). A method according to claim 27, comprising the further step of:

charging, by the service provider computer from the account of the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

Claim 40 (new). A system according to claim 29, further comprising:

each said periodic payment, an interest charge determined on a simple interest basis.

means for charging, by the service provider computer from the account of the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

Claim 41 (new). A system according to claim 30, further comprising:

means for charging, by the service provider computer from the account of the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

U.S. Serial No. 10/592,020 Amendment Dated February 24, 2009 Reply to Notice of February 6, 2009

Claim 42 (new). A computer program product according to claim 31, further comprising: code for charging, by the service provider computer from the account of the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis.

Claim 43 (new). A plurality of computer program products according to claim 32, further comprising:

code for charging, by the service provider computer from the account of the person, in regard to each said periodic payment, an interest charge determined on a simple interest basis.
